Dear Mr. Fréchette:

Thank you for your correspondence of May 13, 2014, concerning the Parliamentary Budget Officer Information Request IR0157, in which you requested the number of temporary foreign workers with a labour market opinion who had been issued a work permit.

Enclosed, you will find a data table reporting the numbers for each urban area of employment (based on Census Metropolitan Area) and 4-digit National Occupation Classification code, and sorted by the value of the most recent time period. At this time Citizenship and Immigration Canada (CIC) is reporting to external audiences data up to the end of June 2013. As such, the data in the table is reported by quarter for the years 2000 through June 2013.

The data in the table are reported in a manner consistent with CIC's policy on reporting person-based statistics to an external audience and is intended to protect against a potential release of small values that could be used to identify an individual. For this reason the numbers have been rounded, in a random weighted manner, up or down to a close number wholly divisible by five. Furthermore, any values reported as "0" represent a true null value and any value reported as "--" represents a true value of 1, 2, 3 or 4.

Please do not hesitate to contact me if you require further assistance.

Yours sincerely,

Anita Biguzs
