

OFFICE OF THE PARLIAMENTARY BUDGET OFFICER
BUREAU DU DIRECTEUR PARLEMENTAIRE DU BUDGET

February 13th, 2024

The Honourable Jonathan Wilkinson
Minister of Energy and Natural Resources
Natural Resources Canada
580 Booth Street, 21st Floor Room B5-1
Ottawa ON K1A 0E4

Minister.Ministre@NRCan-RNCan.gc.ca

Information Request: IR0757

Dear Minister Wilkinson:

As you are likely aware, the Parliamentary Budget Officer (PBO) provides independent and non-partisan analysis to the Senate and to the House of Commons about matters related to the nation's finances and the economy, the estimates, certain other government documents, and the cost of proposals. In carrying out my mandate, I often require information held by government departments and Crown corporations and I am entitled to free and timely access – subject to limited exceptions – to such information under section 79.4 of the *Parliament of Canada Act*.

I am currently undertaking an analysis pursuant to paragraph 79.2(1)(b) of the *Parliament of Canada Act*, which mandates the PBO to prepare reports on matters of particular significance relating to the nation's finances or economy that are listed in an annual work plan.

For this analysis, I am requesting historical data and projections of the annual stock and flows of Canada's network of chargers for electric vehicles (EV) by province and charger type. For each series, we are seeking annual historical data starting in 2015 (or the earliest year available) and projected data to 2035 (or latest year available). My data request is as follows:

- Total stock of government-funded public, privately-funded public and home EV chargers by province and by type: L1, L2 and L3 (DC fast);
- New additions to government-funded public, privately-funded public and home EV chargers by province and by type: L1, L2 and L3;
- Capital and installation cost excluding taxes and subsidies by type of charger: L1, L2 and L3 (this can be provided at the national level if applicable);
- Taxes and subsidies applicable to EV charger capital and installation costs by type of charger: L1, L2 and L3.

The following data is not required by province and can be provided at the national level:

- Charging speed by type of charger: L1, L2 and L3.

In order to provide the analysis to parliamentarians in a timely manner, I ask the information to be provided to my office no later than **March 1st, 2024**. If access to the requested information cannot be granted by that date, a response must be provided by you or your deputy minister as soon as possible.

Should you or your staff have any questions about this information request, the analyst responsible, Tim Scholz can be contacted directly at Tim.Scholz@parl.gc.ca, 613-219-1109.

Attached is a reply form. It too should be filled out and returned by March 1st, 2024, whether or not you provide access to the requested information. Should you refuse to provide access to the requested information, you or your deputy minister must provide a written justification for the refusal as required under section 79.41 of the *Parliament of Canada Act*.

The response letter will be posted on the PBO website and, therefore, it should not be marked "confidential". As well, the requested information should be attached separately. If this information is confidential, please clearly mark it as such, either on the electronic spreadsheet or the hard copy version.

Providing timely and effective analysis to the Senate and House of Commons and promoting greater budget transparency and accountability are the PBO's primary objectives. The degree to which this is possible depends, to a large extent, on free and timely access to quality information held by government departments. In doing so, you are assisting us in better serving the Senate, the House of Commons, and their members.

Yours Sincerely,

Yves Giroux

Parliamentary Budget Officer

c.c.: Antoine Brunelle-Côté, Privy Council Office, Assistant Secretary to the Cabinet, Liaison Secretariat for Macroeconomic Policy

Michael Vandergrift, Deputy Minister, Natural Resources Canada
