Dear Yves Giroux:

Thank you for your correspondence of February 13, 2024, regarding your information request for historical data and projections of the annual stock and flows of Canada's network of chargers for electric vehicles by province and charger type.

I am pleased to submit the following sources as well as the additional attached data and information:

- the [Electric Charging and Alternative Fuelling Stations Locator](#) public webpage providing the number and location of public electric vehicle charging stations and ports in Canada;
- the [Open Maps: projects funded by the Electric Vehicle and Alternative Fuel Infrastructure Deployment Initiative and the Zero Emission Vehicle Infrastructure Program](#) public webpage providing information on Natural Resources Canada's funding of electric vehicle charging ports; and
- Natural Resources Canada program data information providing the categories (i.e., public or non-public) of funded chargers through the Electric Vehicle and Alternative Fuel Infrastructure Deployment Initiative and the Zero Emission Vehicle Infrastructure Program (attached).

My officials will forward the associated formal Parliamentary Budget Officer reply form to your office to satisfy the remaining requirements of this request.

I would also like to inform you that Natural Resources Canada has commissioned a Dunsky Energy and Climate Advisors report, titled "Electric Vehicle Charging Infrastructure for Canada: Updated Forecasts of Vehicle Charging Needs, Grid Impacts and Costs for All Vehicle Segments," which I believe is relevant to your study. The Department is in the process of finalizing this report, which will be shared with you no later than April 30, 2024.

Canada

Should you require any additional information or data, please do not hesitate to contact Anna Van der Kamp, Executive Director of the Transportation and Fuels Decarbonization Program Branch, by email at anna.vanderkamp@nrca-rncan.gc.ca.

Yours sincerely,
